Diluted product: Rinse out mouth and then drink plenty of water. Do not induce vomiting; call for medical help immediately.

Inhalation

Concentrate: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then, give artificial respiration, preferably mouth to mouth. Call a poison control center or doctor for further treatment advice.

Diluted product: Supply fresh air; consult Physician in case of complaints.

Most important symptoms and effects, both acute and delayed:

Eyes: Causes eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision (**for concentrate**).

SECTION 5 - FIRE-FIGHTING MEASURES

(Concentrate Only. Diluted product is a water-based material.)

Suitable extinguishing media: Water fog. Foam. Dry chemical powder. Carbon dioxide (CO₂).

Unsuitable extinguishing media: Do not use water jet as an extinguisher, as this will spread the fire.

Hazardous Combustion Products: Decomposition products include Carbon dioxide, carbon monoxide, and nitrogen oxides. During fire, gases hazardous to health may be formed.

Advice for Fire Fighters: Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do so without risk.

Fire Fighting Equipment: Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Further Information: No unusual fire or explosion hazards noted.

SECTION 6 - ACCIDENTAL RELEASE MEASURES:

Personal precautions, protective equipment and emergency procedures

Wear protective clothing as described in Section 8 of this safety data sheet.

Environmental Precautions (for both Concentrate and Dilutions):

Water Spill: Avoid discharges into drains and open waterways.

Land Spill: Avoid discharge to soil.

Methods and material for containment and cleaning up: Isolate spill or leak area immediately. Keep unauthorized personnel away. Do not touch or walk-through spilled material. Do not allow spilled material to mix with other products

For concentrate: To clean up spill, flood area with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer.

For diluted product: Absorb liquid components with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust) or clean mop. Clean the affected area with care and rinse with water.

References to Other Sections:

See section 13 for disposal considerations. See Section 8 for Personal Protective Equipment (PPE). See Section 12 for additional Ecological Information.

SECTION 7 - HANDLING AND STORAGE

(Both for Concentrate and Dilutions)

General: Keep container closed until used. Do not contaminate water, food, or feed by storage or disposal. Store in an area inaccessible to children.

Precautions for safe handling

Avoid contact with eyes. Avoid prolonged exposure. Provide adequate ventilation. Observe good industrial hygiene practices. Use care in handling/storage. Wear the appropriate personal protective equipment (see section 8).

Conditions for Safe Storage, including any incompatibilities

Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. Avoid freezing conditions. Avoid high temperatures. Do not exceed storage temperatures of 95°F. Best storage temperatures are between 35°F and 85°F. Overheating in storage may result in increased degradation of product, which will decrease product effectiveness. Keep concentrate away from incompatible materials. Refillable container: Refill this container with pesticide only. Do not reuse this container for any other purpose.
