

GREEN CLEANING
ENVIROX[™]
A HEALTHIER WAY[™]

In 1995, we had a vision.

We saw a cleaning industry that used safer, less toxic, and more efficient cleaning products.

After years of perseverance, we found the answer—a formulation comprised of hydrogen peroxide, citrus oil, and gentle surfactants. We named the product H₂Orange₂ Concentrate 117 and introduced it in 1998.

Amid the doubt of skeptical cleaning professionals, we brought this revolutionary hydrogen peroxide technology to real-life cleaning challenges, proving that one product could be environmentally preferred, powerful, and versatile.

Today, ten years later, we look at over 50 other hydrogen peroxide products on the market and appreciate the industry's transformation and the healthier environments we have helped create.

Our patented hydrogen peroxide formulation continues to be the standard that others try to duplicate.

We are excited about the possibilities that are ahead of us.

The best is yet to come.
